

## INFORMATION TO USERS

***According to art. 26 of Legislative Decree 14 March 2014, no. 49 and implementation of Directive 2012/19/EU on waste electrical and electronic equipment (WEEE)***

The barrel box symbol on the equipment indicates that the product at the end of its useful life must be subject to separate collection.

The user will therefore have to give the equipment at the end of life to the appropriate collection centers of electrical and electronic waste, or hand it over to the reseller at the time of the purchase of a new type of equivalent equipment, or give it to the retailer free of charge.

The appropriate differentiated collection for the subsequent start of the dismantled equipment for recycling, treatment and environmentally friendly disposal helps to avoid possible adverse effects on the environment and health and favors the reuse and / or recycling of the materials it contains the equipment.

The abusive disposal of the product by the holder implies the application of the administrative sanctions provided for by the applicable law.
